

SEAL-TIGHT

WATERPROOF PROTECTORS

**ALLOWS PATIENTS TO
SHOWER & BATH
WITHOUT GETTING
DRESSINGS WET**

NOW AVAILABLE ON FP10 FOR NURSE / GP PRESCRIPTION

**For all sufferers of leg and foot ulcers,
chronic wounds, burns and more**

SEAL-TIGHT is the ONLY such device that is:

- Available on Nurse/GP prescription across the UK.
- Perfect for all types of dressings, including multi-layer pressure bandages.
- Tried and proven in a clinical environment.
- Supplied under contract to NHS hospitals.
- 100% waterproof, even in a bath.
- Pressure free on the affected part of the limb.
- 100% latex free.

The advantages of using SEAL-TIGHT:

- Avoid re-bandaging ahead of schedule.
- Vastly improves the patient's Quality-of-Life.
- Seal-Tight is completely waterproof, even when fully submerged.
- Patients will once again be able to shower or bath whenever they want.
- Easy, single handed application.

CV27105: Adult Foot/Ankle

This model will be the right one for most patients with e.g. foot ulceration where the dressings are only on the foot or ankle.

The bag length is 11", measured from the back of the heel to the top of the bag, so it actually covers up to half the calf.

If the skin is very sensitive due to the condition, then some patients will prefer one of the models below, so the area of contact (which is very gentle) is higher up the leg.

CV27103: Adult Short Leg

This is the typical model for patients with a leg ulcer. The bag length is 23" which is suitable for any adult.

This will easily be fitted over even multi-layer pressure bandages.

As a rule of thumb, measure the widest part of the leg being covered and if it is up to 16" in circumference, then this is the one to prescribe - if it is more, then the model below.

CV27106: Adult Wide Short Leg

Often selected as an alternative for the standard short leg - the bag length is again 23" but the ring at the top is wider.

Many patients also prefer this model if the skin is sensitive.

Can be worn above or below the knee.
